TRIAL	-----	£50	-----	-----
Individual Oxygen Mask	£10 per course			
Targeted Light Pad/s	£15 per session	Add on Option		

Targeted Hyperbarics -Combining Oxygen and Light Therapies

Targeted Hyperbarics is a synergistic approach to healing, allowing people to experience the combined benefits of Hyperbaric Oxygen Therapy and Infra-red and Red Light Therapy for greater localised effects and penetration of healing. This enables the patient to direct the oxygen towards a particular part of the body for priority treatment and focused healing. For over 40 years now, many studies have shown the benefits of using Light in healing.

A very convenient option is a home HBOT unit delivered to your home. This enables multiple members of the family to use the HBOT and allows you to fit sessions in around work and home life.

Rental can be extended from one month to two or three months at a time.

Home Rental Charges	
HBOT (Including oxygenator and mask)	
£850 /£950/£1050* Depending on the type of chamber	1 month rental
£250	Delivery, set-up and training
